

## FACTSHEET

### The Ukraine crisis at a glance

1. Over the last year, nearly one third of the population of Ukraine – or roughly 14 million people – have been forced to flee their homes.
2. In the last year there have been more than 760 attacks on health care facilities.
3. Around 195,000 babies were born in Ukraine in 2022.
4. More than 3.5 million people need gender-based violence prevention and response services.
5. 10 million people in Ukraine are at risk of or already suffering from acute stress, anxiety, depression and post-traumatic stress.

### UNFPA's humanitarian support to Ukraine and Moldova in 2022

1. Some 68,500 women – over a third of the women who gave birth in Ukraine in 2022 – delivered at maternity facilities supported by UNFPA.
2. In Ukraine, UNFPA has established:
  - More than 48 centres for survivors of violence and women at risk including shelters, crisis rooms, a national hotline, and more than 100 mobile psychosocial support teams.
  - 20 mobile health clinics that take reproductive health care, including family planning and antenatal and postnatal care, to some of the hardest to reach areas of Ukraine.
  - One fully-equipped mobile maternity unit in Kharkiv that provides emergency obstetric care, including caesarean sections.
3. UNFPA delivered more than 115 tonnes of reproductive health medicines and equipment to over 50 hospitals and perinatal centres across Ukraine, including supplies for emergency obstetric care and the clinical management of rape. This is enough to meet the priority reproductive health needs of 7.2 million people.
4. In Moldova:
  - UNFPA agreed a partnership with the government that ensures both refugee and host communities can access maternal and reproductive health services through the national health system.
  - UNFPA upgraded and equipped nine specialized hospitals with additional operating theatres, delivery rooms and intensive care units for mothers and newborns.
  - UNFPA donated 20 ambulances to the government to improve referral times for women needing emergency obstetric care in hard to reach regions.
  - UNFPA established 28 safe spaces for survivors of violence and women at risk and mobile teams that cover all regions of the country.
